INTRODUCTION & PROBLEM STATEMENT

Introduction

- **80% of Singaporeans live in HDB**
- **Housing is the probably the largest purchase in one's lifetime**

INTRODUCTION & PROBLEM STATEMENT

Problem Statement

- The objective of this project is to design a regression model to predict resale prices of HDB flats, using past 5 years resale HDB data from data.gov.sg.

CONCLUSION & RECOMMENDATIONS

- **Top 3 features**
 - **Floor area**
 - **Balance lease**
 - **Location**

LIMITATIONS, MOVING FORWARD

Limitations

- Need to retrain model
- Only applicable to HDB

What's next?

- Deploy to dashboard
- Consider to impute other features:
 - Proximity to amenities, transportation, etc
 - Renovation, theme, quality of build
- Include private property data
